TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Responsive Web Design, DOM Manipulation, Bootstrap, GSAP, Locomotive.js
- **Backend:** Node.js, Express.js, REST APIs, Socket.io
- **Database:** MongoDB, CRUD Operations, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, Render
- **Programming Languages:** Java, JavaScript, Python, C
- **Tech Stack:** MERN Stack (MongoDB, Express.js, React.js, Node.js)

“‘latex

WORK EXPERIENCE

Lunar Finis

- Developed backend features by creating RESTful APIs with Node.js and Express.js
- Designed and built MongoDB schemas, handling CRUD operations with Mongoose
- Performed QA testing and tracked issues using Notion
- Improved mobile responsiveness across dashboard pages by refining spacing, margins, and padding while preserving desktop layout and content
- Standardized UI icons across the application using Font Awesome and SVG icons
- Refactored navigation to use Next.js's `Link` component for optimized client-side routing
- Conducted frontend performance profiling using React Profiler
- Built a landing page using Next.js
- Collaborated with team members using Git and GitHub for code management

PROJECTS

Wanderlust

Technologies: Node.js, Express.js, HTML5, CSS3, JavaScript, EJS, MongoDB Atlas, Cloudinary, Mapbox API, Render, JWT Authentication, MVC Architecture

- Built a full-stack web application enabling users to create and manage location-based listings, upload images, add reviews, and explore locations on an interactive map
- Implemented secure authentication and authorization with protected CRUD routes, ensuring users can only manage their own content
- Designed the frontend using HTML5, CSS3, JavaScript, and EJS templating, following the MVC architecture
- Integrated Mapbox API for real-time destination maps and Cloudinary for image uploads
- Deployed the application on Render with MongoDB Atlas as the database

Skillbook

Technologies: MongoDB, Express.js, React.js, Node.js, JWT Authentication, Socket.io, Vercel, Render

- Built a full-stack service marketplace using MongoDB, Express.js, React, and Node.js
- Implemented JWT authentication and role-based access control for Customers, Providers, and Admins
- Developed provider approval workflows, service management, and booking functionality
- Added real-time customer-provider communication using Socket.io
- Deployed the application using Vercel, Render, and MongoDB Atlas

EDUCATION

B.Tech in Computer Science Engineering

CGPA: 8.29 (Till 6th Semester)

Shah & Anchor Kutchhi Engineering College, Mumbai

HSC (12th Standard)

65.67%

SSC (10th Standard)

74.80%
